SUMMARY

I am a Java/Python developer transitioning into LLM data & prompt work. I prepared screening-ready samples for SFT, RLHF, safety review and RLVR testing. Available 20–25 hrs/week.

HIGHLIGHTS

- 10 multi-domain prompts (customer support, technical, education, safety).
- 25 SFT pairs (JSONL) — instruction→ideal response examples.
- 10 RLHF A/B comparisons with 1-line rationales.
- 3 safety/redaction examples with safe alternatives.
- 1 RLVR unit-test (Python) showing verifiable reward logic.

SAMPLE (quick)

Prompt: "Explain photosynthesis to a 10-year-old."

Golden response: "Photosynthesis is how plants use sunlight, water, and air to make food and oxygen..."
